

DATA CENTER CABLING SYSTEMS MARKET

NEW STUDY ANALYZES AND FORECASTS NEW NICHE MARKET FOR STRUCTURED CABLING SYSTEMS (SCS).

- Recent release of cabling standard for data centers fostering SCS growth
- 3 unique architectures identified, described, analyzed and forecast
- Market niche offers opportunity for both copper and fiber cabling suppliers:
 - Small Sites – all copper cabling
 - Medium Sites – hybrid copper/fiber cabling
 - Large Sites (ISPs) – all fiber cabling
- Substantial new market for plenum cables

- Above chart from study indicates both a large size market (\$2.2 B) and high growth rate (26.8%).
- Product forecasts include both fiber & copper cable media and fiber & copper apparatus devices, such as patch panels, outlets, etc.
- Fiber cabling products forecast include: cables, interconnect panels, connectorized cable, field-installable connectors, outlets & modular cassette plug n' play devices.
