

# VOIP CABLING SYSTEMS MARKET

## *A New Report Highlighting the Structured Cabling Systems Market*

- VOIP (Voice Over Internet Protocol) offers a significant new market opportunity for structured cabling system (SCS) suppliers.
- For most new cabling installations, both PC LAN networking and VOIP are being installed simultaneously.
- VOIP is finally making its mark. Past issues of quality, security, etc. have been resolved.
- Cable for VOIP applications is predicted to account for the major UTP cable market in 5 years.

- The above chart shows significant growth in VOIP telephones over the next 5 years.
- All of these VOIP telephones will require new cabling.
- SCS suppliers' strategies need to change to incorporate VOIP cabling solutions.
- **Are you ready for this new market? How large is this market? – for UTP cabling? – for fiber cabling?**
- How does this market relate to the SCS market saturation during the past several years? These and other relevant issues are addressed in this new report.
- **"VOIP Cabling Systems Market"** provides 5-year forecasts for:
  - UTP cable by categories
  - Fiber cable by SM-MM
  - UTP apparatus by categories
  - Fiber apparatus by SM-MM
